Conjugating 3 Note Chords

conjugate

verb |'känjəgāt|

1 [trans.] Grammar give the different forms of (a verb in an inflected language) as they vary according to voice, mood, tense, number, and person.

Chords are a lot like verbs in that their base form can be conjugated to vary them. Outlined below are three chord groups based on different inversions of a major triad. Each form has the root, third or fifth as the lowest note.

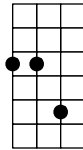

With the base major triad defined, you can start to alter or conjugate them to change their voicing. With only three notes being sounded, the root or fifth will be dropped as extensions are added. To find a given chord, locate the root note of the major triad and alter the chord from there.

Chord extensions beyond Minor 7b5 start to lose their relationship to the base major triad form. That's not to say you can't form these chords with three notes. They just don't fit squarely into one of the three groups below.

The remainder of this document provides a variety of chord voicings that you might find useful.
